LANGUAGE

- Tamizh (Native)
- English (Professional)

PROJECTS

📌 TO DO LIST APPLICATION

MADE WITH: HTML, CSS, JAVASCRIPT

To Do List Webapp An Webapp which is created by using Javascript, html, css and it is used for Schedule Meetings ,Track progress Web application which implements a to-do list which you can follow a routine or schedule

📌 CHAT APPLICATION

MADE WITH: SOCKET

Chat Application An real-time chat Application using Java Socket communication and for seamless and responsive user interactions

📌 MUSIC PLAYER

MADE WITH: REACT JS

I've developed an elegant music player that utilizes JSON metadata to dynamically load a diverse range of tunes. This innovative application offers a user-friendly experience, allowing seamless navigation through a curated collection of music, all powered by dynamic JSON metadata integration.

📌 CRUD APP - MERN STACK

MADE WITH: MERN STACK

I built a MERN stack CRUD app, enabling seamless data management through MongoDB, Express.js, React, and Node.js.
